7th March 2023

Dear Sunella,

It has come to our attention of late that children have begun to show an aversion toward math. In order to remedy this situation, the Board of Governors has mandated that Bishop's College instate a Math Lab in the premises, and focus on developing their aptitude and instilling an appreciation for the subject during the next two years.

The school is currently facing difficulty financing this project and request the kind assistance of the PPA in order to see it to completion within the given time frame. The quotations and visuals obtained by the Vice Principal have been tabled at the PPA Executive Committee meeting on the 16th November 2022.

Your support in this regard would be much appreciated.

Yours sincerely

Chemali Goonetilleke Herath

Principal
